

NYS Cannabis Research License Collaborator List

The NYS Cannabis Research License provides a platform for advancing the scientific research on cannabis, its applications, and potential benefits. It enables researchers to investigate innovative cultivation techniques, optimize cannabis genetics, explore the plant’s chemical composition, and assess the efficacy and safety of cannabinoid-based treatments for medical conditions.

The following NYS Cannabis Research License Collaborator List details entities willing to partner with cannabis research licensees on their projects. The types of support available include, but are not limited to, offering access to cannabis cultivation spaces, processing facilities or laboratories, as well as providing by sale or donation cannabis product(s) for research purposes. These collaborators provide valuable opportunities by offering resources to prospective researchers who may not have the infrastructure or capacity to fully execute their research project(s).

If you are interested in discussing your research with any of the following collaborators, please send an email to research@ocm.ny.gov with the collaborator number(s) to request their contact information.

| Collaborator Information | Preferred Research Type | | Ways Willing to Assist with Research Projects | |
|--|-------------------------|---|---|--|
| Collaborator #: 001 Entity Type: Registered Organization (ROND) | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | Other | |

| | | | | |
|--|---|---|---|--|
| Collaborator #: 002 Entity Type: Cultivator | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 003 Entity Type: Processor, Cultivator, Adult-use retail dispensary | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 004 | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |

| | | | | |
|--|---|---|---|--|
| Entity Type: Processor, Cultivator | | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 005 Entity Type: Processor, Cultivator | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 006 Entity Type: Processor, Cultivator, Adult-use | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |

| | | | | |
|---|---|---|---|--|
| retail dispensary, Microbusiness (MICR) | | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 007 Entity Type: Processor, Cultivator | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 008 Entity Type: Cultivator | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |

| | | | | |
|---|---|---|---|---|
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | ✓ | Other: Open | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | ✓ | Other: Genomics, acclimation research or data sharing, commercially scaling up popular classic cultivars with New York twists . |
| Collaborator #: 009 Entity Type: Processor, Cultivator, Adult-use retail dispensary (MICR) | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 010 Entity Type: Cultivator | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | | Clinical investigations with investigational products, including human observational studies | | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | | Research on the efficacy and safety of administering investigational | | Assisting with lab testing services for research licensees. |

| | | | | |
|---|---|---|---|--|
| | | products as component of medical treatment | | |
| | | Other | | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 011 Entity Type: Cultivator, Microbusiness | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | ✓ | Other: I am a trained Molecular Biologist with 20 years of lab research experience. | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | ✓ |
| Collaborator #: 012 Entity Type: Cultivator (MICR) | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | | Clinical investigations with investigational products, including human observational studies | | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |

| | | | | |
|--|---|---|---|--|
| | ✓ | Other: Efficacy of regenerative cultivation techniques. | | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 013 Entity Type: Laboratory | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | ✓ | Assisting with lab testing services for research licensees. |
| | | Other | | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 014 Entity Type: Cultivator | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |

| | | | | |
|---|---|---|---|--|
| Collaborator #: 015 Entity Type: Microbusiness (MICR) | ✓ | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 016 Entity Type: Adult-use retail dispensary | | Agricultural research | | Donating cannabis or cannabis products to research licensees. |
| | | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |
| Collaborator #: 017 Entity Type: Processor | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |

| | | | | |
|---|---|---|---|--|
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee's study protocols. |
| | | | | Other |
| Collaborator #: 018 Entity Type: Cultivator | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |
| | ✓ | Clinical investigations with investigational products, including human observational studies | | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | | Dispensing cannabis products directly to research study subjects in accordance with the research licensee's study protocols. |
| | | | | Other |
| Collaborator #: 019 Entity Type: Adult-use retail dispensary | ✓ | Agricultural research | ✓ | Donating cannabis or cannabis products to research licensees. |
| | ✓ | Genomic research | ✓ | Selling cannabis or cannabis products to research licensees at a discount. |
| | ✓ | Testing chemical potency and composition levels* | ✓ | Allowing Cannabis Research Licensees to conduct studies on the premises of your approved site or location. |

| | | | | |
|--|---|---|---|--|
| | ✓ | Clinical investigations with investigational products, including human observational studies | ✓ | Assisting with the development of new product types and formulations that are of interest to cannabis research licensees. |
| | ✓ | Research on the efficacy and safety of administering investigational products as component of medical treatment | | Assisting with lab testing services for research licensees. |
| | | Other | ✓ | Dispensing cannabis products directly to research study subjects in accordance with the research licensee’s study protocols. |
| | | | | Other |

*Entities may do chemical composition and potency test for research and development purposes, however any cannabis products that are intended to be sold for retail sales must have analytical testing performed by a NYS permitted laboratory.

New Collaborators

If you are a NYS licensee, permittee, or registrant interested in providing services or resources that support cannabis research projects, please complete the [NYS Cannabis Research License Collaborator List survey](#) to be added to the above list.
